# Kersia's Dairy Hygiene Solutions

Kersia's range of detergent and disinfectant products have been created for use on any dairy farm.

Our core product range consists of udder-health, dairy parlour hygiene and biosecurity solutions.

These core products ultimately benefit farmers by creating a healthier and more productive farm business through the well-being of their livestock.

In summary, our products can help to improve livestock health, which contribute to the reduction in vet bills and assist in maximising farm productivity, in order to help sustain vital and valuable income levels for farm businesses.

Multiple pack sizes are available, please contact your ruminant sales manager for more information or contact the Lockerbie office on +44 (0) 1576 205480 or email [enquiries.uk@kersia-group.com](mailto:enquiries.uk@kersia-group.com)

# Parlour & Cluster Hygiene

Core Product Range

## Octaklean

- Powerful alkaline circulation detergent suitable for use with all parlours and bulk milk tanks
- High cleaning performance, sequestrant concentration and effective causticity
- Low foaming, degreasing, anti-scaling
- Effective in hard water areas
- Free of chlorine, phosphate and EDTA to limit the release of controversial components into the environment
- Biodegradable wetting agents

## Night Wash

- Phosphoric acid detergent for the removal of scale deposits in milking equipment and bulk milk tanks
- It has been specifically developed for direct-to-line milking parlours and assists in the cleaning of milkflow meters
- Suitable for use in either hard or soft water areas

## Octacid One

- Innovative chlorine free detergent and disinfectant solution for your milking machines and tanks
- Effective removal of milkstone
- Bactericidal and yeasticidal disinfectant
- Disinfection is based on Octanoic Acid
- To use in conjunction with Octaklean

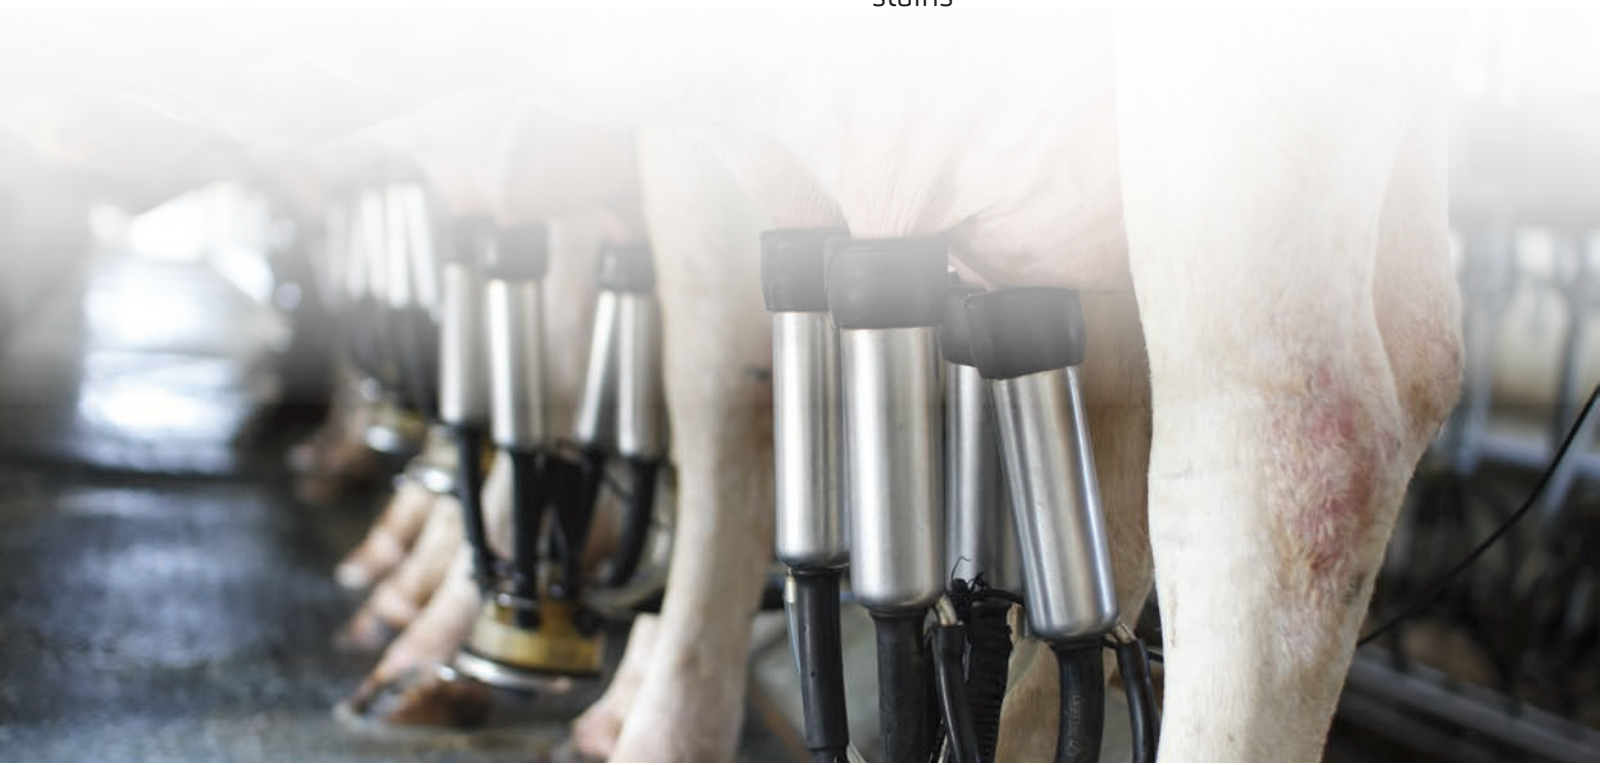

## Dual Acid

- A blended descaler and circulation cleaner
- Milkstone removing capabilities for use in dairy farms
- Contains Nitric and Phosphoric acid and can be used for general milkstone removal and descaling
- Provides effective cleaning at normal temperatures and its performance is enhanced if used in hot water up to 85°C

## Milkstone Remover

- Phosphoric acid based descaler designed for the removal of scale deposits in milking equipment and bulk milk tanks
- Suitable for use in hot solutions, for both pipeline machines and bucket plants
- Effective at removing iron and rust stains

## Clearway Plus

- Alkaline chlorine-free circulation powder cleaner
- Effective cleaning of milking parlours and milking plant equipment
- Specially formulated for use in hard water areas
- Contains high levels of sequestrants and 80% w/w Sodium Hydroxide and it can also be used hot or cold

**Please Note: Disinfectants are regulatory biocides.  
Use biocides safely. Before use read the label and  
product information. \*For full DEFRA approval visit:
